Lifestyle Investment 2021-2022

Thank you so much for being interested in my work. A couple quick things before we get down to the nuts and bolts of the different packages.

My Style: My photography style is as simple as I can get. I lean towards photojournalism- candid photography mostly at weddings, family, engagement, maternity, and any other photo shoots because I feel it is my job to capture the moments and emotions exchanged between people. I have often heard "Wow, how did you get that photograph?! I didn't even know you were there!" I do however offer guidance during shoots, but I try to keep things organic and authentic without making you feel posed. I do not deliver every image I take at a session, I do however deliver all images that I have edited and feel are the best representation of your photo session.

Investment: Lifestyle photos should be something that will be cherished for your entire life and perhaps many generations. Whether it is maternity, boudoir, family, senior, pets, or just for fun, it is so important to me to create and capture that moment in your life as it is your authentic truth. These photos are a forever snapshot of your life in that exact moment in time that will withstand generations.
