Engagement Investment 2021-2022

Thank you so much for being interested in my work. A couple quick things before we get down to the nuts and bolts of the different packages.

My Style: It is so important that you absolutely LOVE my style of photography in order to absolutely LOVE your photographs. My photography style is as simple as I can get. I lean towards photojournalism-candid photography mostly at weddings and family photo shoots because I feel it is my job to capture the moments and emotions exchanged between people. I have often heard "Wow, how did you get that photograph?! I didn't even know you were there!" I do however offer guidance during shoots, but I try to keep things organic and authentic without making you feel posed. I do not deliver every image I take at a wedding, I do however deliver all images that I have edited and feel are the best representation of your day.

Investment: Engagement photos should be something that will be cherished for your entire life and perhaps many generations. It is my goal to photograph you and your partner just SO IN LOVE during this shoot. This is when you get to scream from the mountain tops just how much you care for your person. You are welcome to include children in this shoot as well both human or furry/feathered/finned family members :)
